260227 iConnect Design Approach - Update Legacy Forms to React

Project Overview

This project is closing out platform tech debt by creating all MVC functionality in React. Future projects will be to migrate customers from MVC to React, and then a last project will be to deprecate the MVC software. This will have a positive impact on future UI development by reducing the UI project development time and cost.

Update legacy forms functionality to the React code for wizards. Currently, all legacy forms work needs to be done separately in ASP.NET MVC, which often requires double development and testing for forms and wizards.

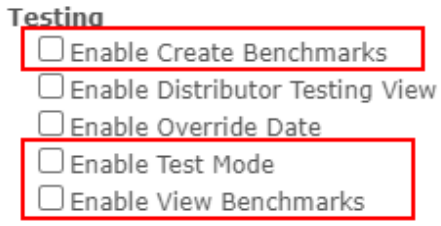
Research all legacy forms functionality and determine what is needed in React and what can be removed due to lack of use. The goal is to get to a single code base for forms and wizards, so we are not creating and maintaining code in two locations.

This is a multi-release project. This part of the project is for May 2.24 only.

1 Remove Benchmarks

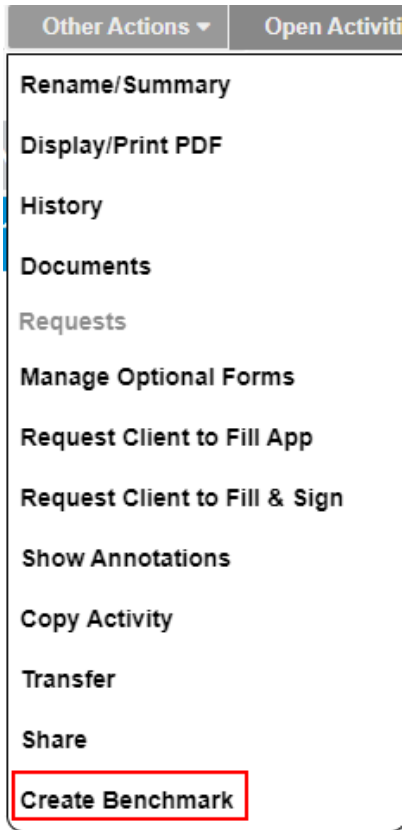
Part of upgrading the legacy forms to React is to eliminate tools not being actively used by clients. The benchmark tool is only available in forms and is not actively being used by clients, therefore we have decided to remove the functionality after verifying with clients that have used it in the past.

1. Organization Settings/Groups - remove the Enable Create Benchmarks option under the Testing section.

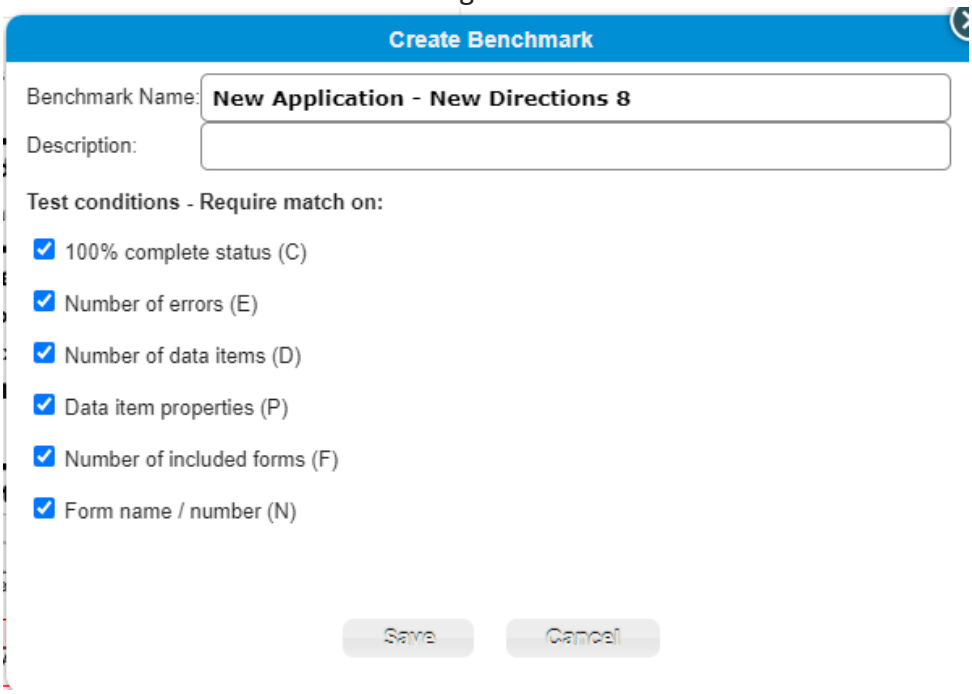


CONFIDENTIAL ©2022 Insurance Technologies, LLC. All rights reserved.

2. Other Actions - remove Create Benchmark.

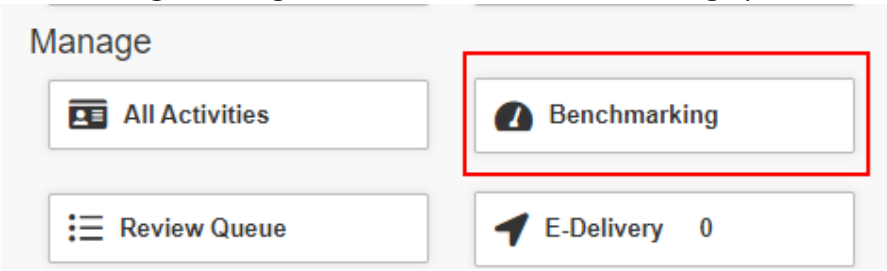


3. Remove Create Benchmark dialog

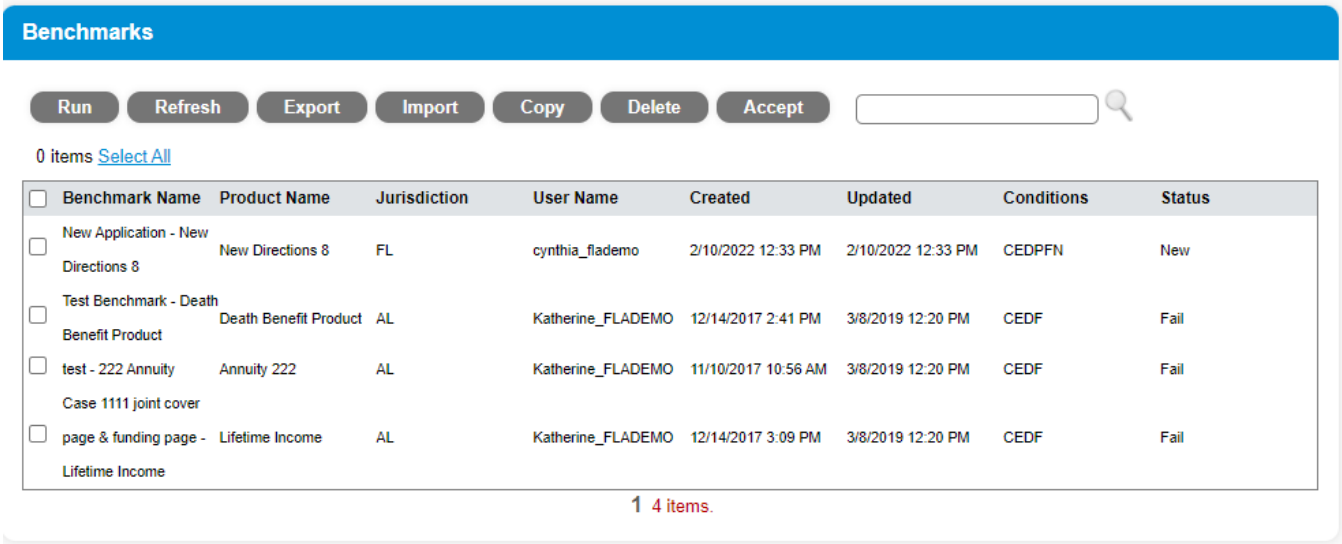


CONFIDENTIAL ©2022 Insurance Technologies, LLC. All rights reserved.

4. Home Page, Manage Section, Remove Benchmarking option



5. Remove Benchmarks Dialog (opens after selecting Benchmarking)



Acceptance Criteria

- Verify the Group options have been removed.
- Verify Create Benchmark and View Benchmark have removed from Other Actions.
- Verify Create Benchmark and View Benchmarks dialog are removed.
- Verify Benchmarking is removed from the Home page Manage section
- Verify the Benchmarks dialog is removed.
- Verify (dev) benchmark code has been removed.

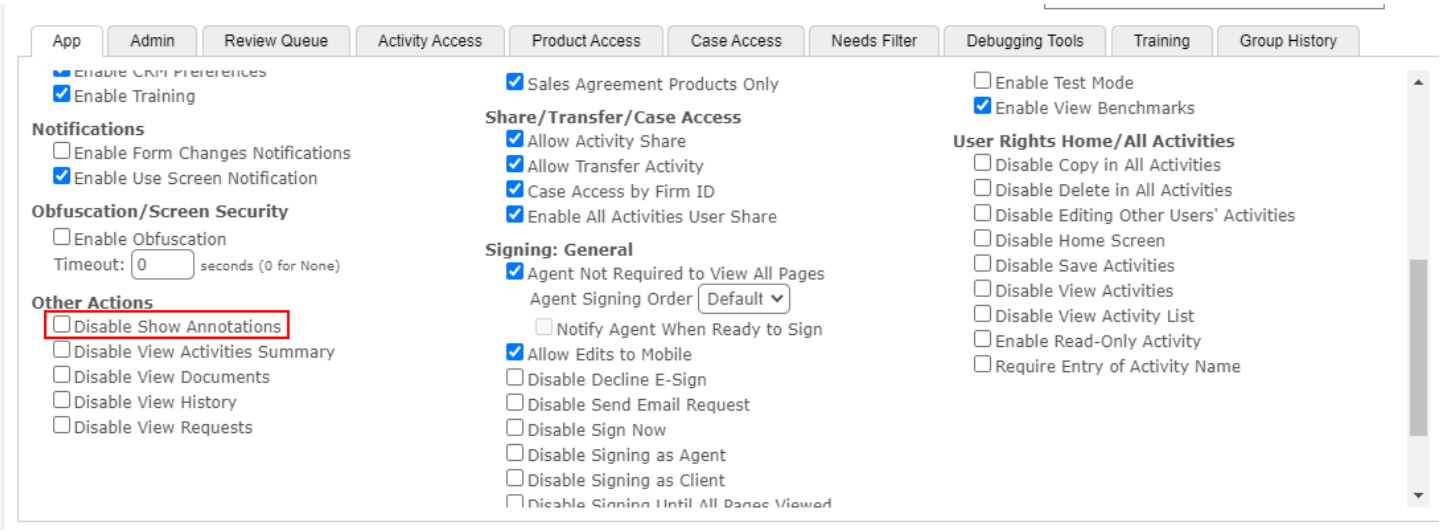
2 Remove Disable Show Annotations from Groups

Remove the Disable Annotations from Group Options. This is related to the story to remove it from Other Actions in the FLApp.



Acceptance Criteria

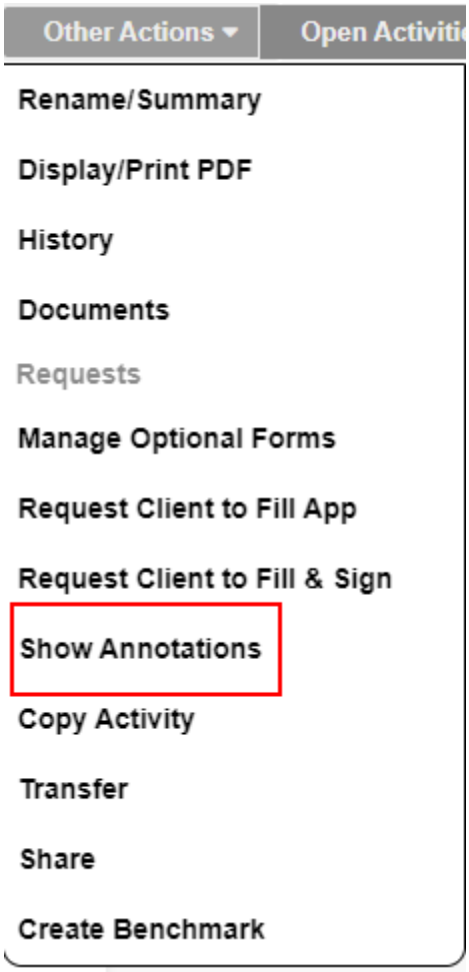
- Verify the Group Option has been removed in the Other Action section.

CONFIDENTIAL ©2022 Insurance Technologies, LLC. All rights reserved.

3 Remove Annotations from Other Actions

Part of upgrading the legacy forms to React is to eliminate forms-only functionality not being actively used by clients. Annotations is only available in forms.

Remove from Other Actions Menu:



Do not remove the Annotations code yet. The plan is to go live and make sure no clients have an issue with removing the functionality. The SMR's did reach out to confirm with the clients.

Acceptance Criteria

- Verify on Forms only product sales agreements that Annotations no longer appears in the Other Actions menu.
