

## iConnect 163150 Design Approach

### Project Overview

Usability improvement for validation messages. While in data entry in FireLight, a validation message may cover up a field. In order to see the covered field, the user needs to tab to another field. Add a method so user can hide/close a validation message popup.

### Features/Requirements

- Add an '[X]' in validation messages. The validation message will be closed when the user clicks the [X].

### Use Cases / Workflow Changes

There are no changes to the normal workflow of the system.

### Admin Changes

There are no changes in FireLight Admin.

### App Changes

Add an '[X]' in each validation message so a user can close it. For this, we need to add a <span> for [X] in validation message. We also need to add a class ("closeVM") in site.css that will style span.

### Integration Changes

None

### UI Mock Ups

Here is an example:

6. PREMIUM PAYMENT

☐ Premium Amount Remitted with Application: \$  This is a required field. [X]

### How to Enable and Use This Feature

In data entry of an application, when a validation message appears, the user can close it by clicking the '[X]' at the end of the message.

### Areas Impacted

System Area	Yes	Comment
<b>Admin Tool</b>		
- Form Library		
- Design Forms		
- Profile Administration		
- Reports		
- Deployment		
<b>FireLight App</b>		
- New Application		
- Edit Application	Yes	Add an '[X]' in each validation message popup so a user can close it.
- Signature Process		
- Review Queue		
- Manual Review		
- User Preferences		
- Inbound Integration		
- Outbound Integration		
- PDF Generation		
- Email System		
<b>FireLight Console</b>		
- Windows		
- iOS		
<b>Other Systems</b>		
- DTCC Integration		
- Commission Netting		
- Activity Reporting
