Table of Contents

iConnect 252240 Design Approach - Print Form PDF Enhancements	4
1 URL Link related to PDF	4
1.1 URL Path will only show when Print Forms License is enabled for Org	4
1.2 Add a URL path related to Print Form Only PDF	4
1.3 Implement the Download of the PDF from the URL	6

iConnect 252240 Design Approach - Print Form PDF Enhancements

With this enhancement, FireLight will be adding a URL path so users outside of FireLight can access the fillable PDF. This will allow a greater audience to be able to download these forms and allow clients the ability to have a "one stop shop" approach within FireLight.

The current Print Form workflow and upload PDF capability will not be changing.

This whole enhancement will only apply to the Print Forms Activity. A Print Forms License will have to be applied before any of these changes are visible.

Impacts -

Admin:

Forms Library - URL added to the forms library page to allow the PDF to be downloaded. The URL will not be authenticated to allow anyone access to the form. A copy icon has been added to conveniently copy the URL

1 URL Link related to PDF

1.1 URL Path will only show when Print Forms License is enabled for Org

The URL path will only show on the Forms Library page when the Print Forms License has been issued for an organization

Acceptance Criteria

- URL link will show only if Print Forms License is enabled

1.2 Add a URL path related to Print Form Only PDF

We need to add a Form URL path so users outside of FireLight can access these forms. This will be added to the Forms Library page within the Admin tool. This URL path will only show if the Print Form Only Activity has been added to this organization. This link will also have a Copy Link icon next to it for convenience.

This link will have no authentication associated with it so users outside of FireLight can still access it.

This path will be unique, but could be structured something like this:

<https://www.firelighteapp.com/egapp/unsecure/PrintForm?formid=NQ1234&org=alz> (least secure)

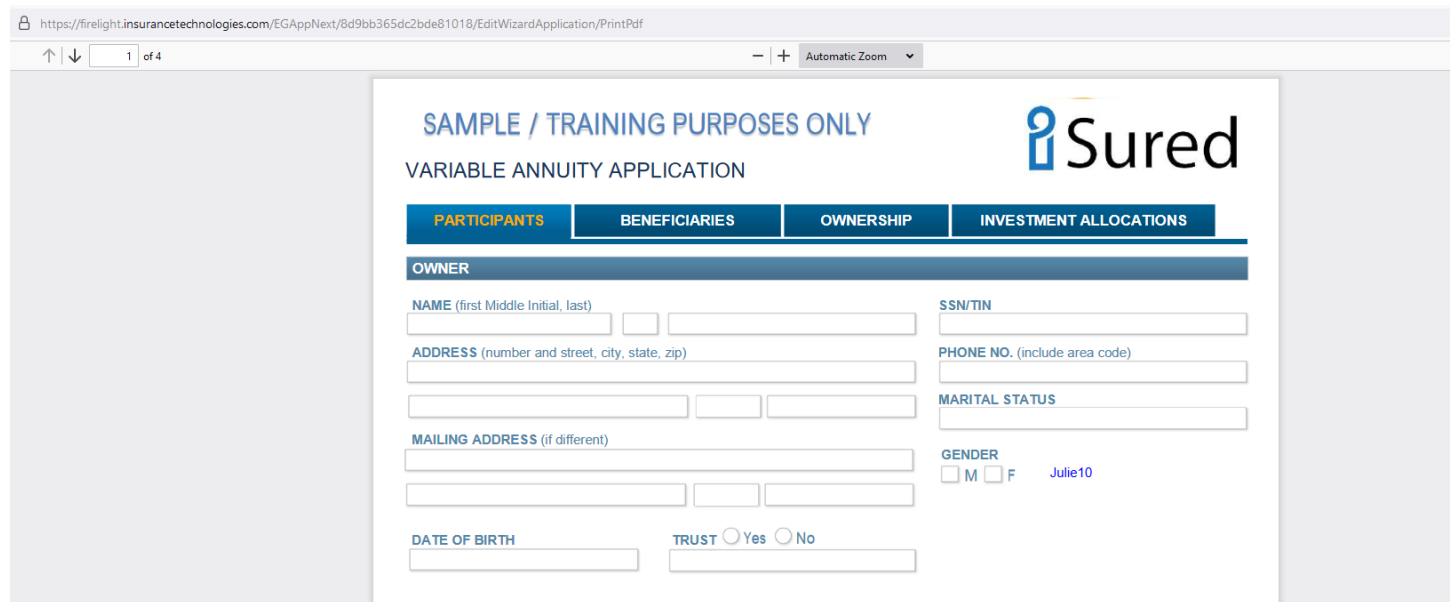

<https://www.firelighteapp.com/egapp/unsecure/PrintForm?formid=722cfd4857bf4fb3a85038ffffbb1c9f&org=alz>

Acceptance Criteria

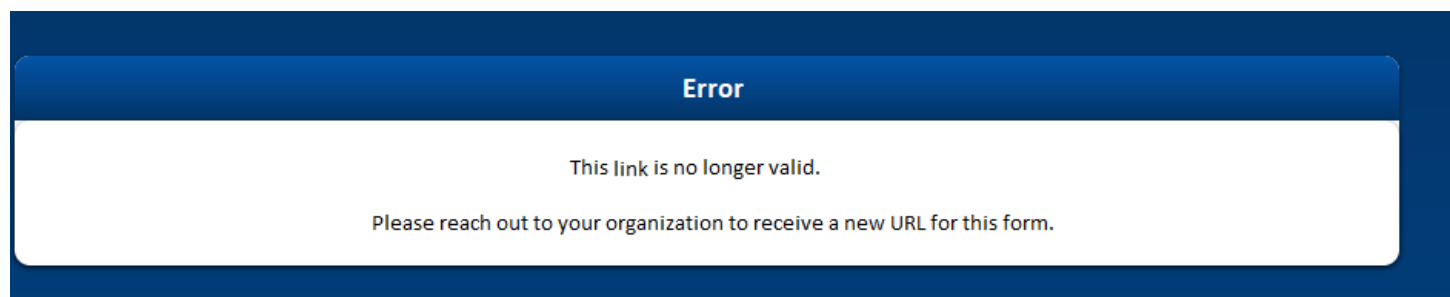

- A form URL will appear on the Forms Library page
- The URL will only show when Print Form License has been added to this organization
- A copy link icon has been added for copying convenience
- The URL link has no authentication associated with it so outside users of FireLight can access it
- The URL path will be unique for each organization, will contain the org partition code, and either the Form ID or Form Name
- Fillable PDF that shows can contain FireLight field definitions
- The fillable PDF that shows will be available for downloading or printing.
- URLs will be environmental specific (i.e. QE will show Firelight.insurancetechnologies.com)

1.3 Implement the Download of the PDF from the URL

When the URL link from FireLight is copied into a new browser, it will show the original fillable PDF, and allow the user to download it.

If the URL is no longer valid, an error message will show letting the user know this information. The message will say "The link is no longer valid. Please reach out to your organization to receive a new URL for this form."

Acceptance Criteria

- When the URL is entered into a browser, the fillable PDF will show.
- If the URL is no longer valid, an error message will show "This link is no longer valid. Please reach out to your organization to receive a new URL for this form."
