1 ExamOne Paramed Order Integration

2 Description

This Integration will allow for a Paramed exam to be scheduled within Firelight. It will send basic proposed insured's demographics and account information to the chosen Paramed ordering system via webservice calls. We are working to incorporate with the ExamOne Paramed ordering system that will be used to schedule a Paramed exam for the insured. The insured/or agent will choose the ExamOne ScheduledNow Paramed online ordering system. Based on the proposed insured's demographics sent in a webservice call, it will determine which examiner(s) covers that requested exam completion location. If there are available time slots for the paramed exam to be completed, it will feed that data back into Firelight. The insured/or agent will select the requested time slot and another webservice call is submitted to ExamOne to lock in the appointment. up the location's Examiner(s) and time slots availability for a requested date. This new functionality will be managed via a custom action button within the activity. All clients that want to use this service are required to contract directly with ExamOne.

ExamOne: ScheduleNow

Impacts:

Activities: Adding checkbox to enable Paramed ordering. Adding a hidden checkbox to determine when the order is to be facilitated: Pre- or Post-Signature.

Admin: Third Party Configuration – Adding a new Service Type

Data Group Properties

Email Templates: Different status of Paramed ordering

UI Changes: Statuses

Common Tags

API Structure: Send required insured data and account info, order ID and availability will open and save in the database. We will then submit the order to ExamOne with the same tracing ID and lock the order with the schedule.

Forms: Data Group Properties

Wizards: Data Group Properties

Reports: Usage

Audits: Addition of new codes needed for ACORD 1122 status updates

ExamOne Services Setup

To use the ExamOne Paramedical Exam services, contracting needs to be established between your organization and ExamOne. Please reach out to ExamOne to start this process.

1 Setting up ExamOne Integration in Admin Tool

There are several steps to setup the ExamOne integration in Firelight.

Organization Settings

In Organization Configuration on the Organization Settings page, Admin Tab: set up the ExamOne Paramedical credentials. ExamOne Paramedical supplies the configuration names and values.

On the Admin tab, click the Third Party Service Config to Edit Link.

1.1.1 Third Party Service Configuration for ExamOne

On the Add New Link at the top of the page. Enter the ExamOne Paramedical service credentials (configuration IDs and values):

Third Party Service Configuration					
Add New					
Service Type	Config Group	Config Name	Config Value	Update	Delete

1.1.1.1 Account Code

Click the Add New link at the top of the dialogue box. In Config Name, type AccountCode. In the Config Value, type the ExamOne Paramedical value. In Service Type, select ExamOne and click Add Config button.

1.1.1.2 Account ID

Click the Add New link at the top of the dialogue box. In Config Name, type AccountID. In the Config Value, type the ExamOne Paramedical value. In Service Type, select ExamOne and click Add Config button.

1.1.1.3 DestinationID

Click the Add New link at the top of the dialogue box. In Config Name, type DestinationID. In the Config Value, type the ExamOne Paramedical value. In Service Type, select ExamOne and click Add Config button.

1.1.1.4 Password

Click on the Add New link at the top of the dialogue box. In Config Name, type Password. In Config Value, type the ExamOne Paramedical value. In Service Type, select ExamOne and click Add Config button.

1.1.1.5 Username

Click the Add New link at the top of the dialogue box. In Config Name, type Username. In the Config Value, type the ExamOne Paramedical value. In Service Type, select ExamOne and click Add Config button.

1.1.1.6 WSPass

Click the Add New link at the top of the dialogue box. In Config Name, type WSPass. In the Config Value, type the ExamOne Paramedical value. In Service Type, select ExamOne and click Add Config button.

1.1.1.7 WSUser

Click on Add New link at the top of the dialogue box. In Config Name, type WSUser. In Config Value, type the ExamOne Paramedical value. In Service Type, select ExamOne and click Add Config button.

The image shows two screenshots of the 'Third Party Service Configuration' interface. The top screenshot shows the 'Add New' form with the following fields: Config Name (empty), Config Value (AccountCode), Config Group (Optional) (empty), and Service Type (ExamOne). The bottom screenshot shows a table of existing configurations.

1.2 ExamOne: New Group - Paramed Ordering

A New Group for "Paramed Ordering" has been added to the App tab. This new section, "Paramed Ordering", allows for the carrier to choose the ExamOne paramed vendor to be used for paramed exam scheduling. Under the "Paramed Ordering" section, two new

options with checkboxes have been added: ExamOne and APPS. These boxes are mutually exclusive, but are optional, so both can be checked or unchecked.

1.3 Wizard Designer

1.3.1 Create Wizard

Set up the product inputs in the Wizard Designer. The wizard will contain the paramed scheduling proposed insured's requirements, such as face amount, age, proposed insured gender, proposed insured state, proposed insured zip code, which will be utilized to determine if a paramed exam is required and which examiner(s) and time slot(s) are available to schedule a paramed exam on a requested exam date.

Refer to the Wizard Designer section in the help for details.

1.3.2 ExamOne: Custom Action Button

Create a Custom Action button on the desired wizard page to launch the ExamOne Paramed Exam scheduling. Optionally add rules to control when the custom action button is available.

Custom Action Properties

☐ Place Field on a New Row

Custom Action Parameter
ExamOneGetMobileTimes

CANCEL OK

Refer to the Custom Action section in the Admin Help for details about adding Custom Action buttons.

- Set the Custom Action to Custom Action.
- The Custom Action Type will now appear. Set this to ExamOne.
- The Custom Action Parameter will now appear.
- Depending on which action you are setting up, you will be **required to manually type** in the coordinating web service call out. ExamOne utilizes:
 - ExamOneGetMobileTimes
 - ExamOneConfirmMobileTime
 - ExamOneGetInCenterLocations
 - ExamOneGetInCenterTimes

- ExamOneConfirmInCenterTime
- SubmitParamedOrder

1.3.3 Add a new Custom Action Type named ExamOne for wizard

Add a new Custom Action Type to the Wizard and Form Designers. When “Custom Action” is selected under Custom Action, another dropdown appears names Custom Action type with “ExamOne” as an option in the list. This will be used to identify which vendor will be utilized in the wizard or form, which will be used to launch ExamOne.

1.3.4 Add Custom Action Parameter to Custom Action Properties

“ExamOne” is the Custom Action Type when a Custom Action button is added through the forms/wizard designer.

Custom Action Parameters – you will be ***required to manually type*** in the coordinating webservice all out. ExamOneE utilizes:

- ExamOneGetMobileTimes (this webservice calls the ExamOne Schedule4Real service to retrieve a list of Mobile Paramed Exam dates and time slots available)
- ExamOneConfirmMobileTime (this webservice calls the ExamOne Schedule4Real service to the book the Mobile Paramed Exam appointment)
- ExamOneGetInCenterLocations (this webservice calls the ExamOne Schedule4Real service to retrieve the available In Center Locations that are available for the Paramed Exam appointment to be completed at based on the Insured's zip code)
- ExamOneGetInCenterTimes (this webservice calls the ExamOne Schedule4Real service to retrieve a list of the available dates and time slots that are available at the desired In Center location for the Paramed Exam appointment to be completed at)
- ExamOneConfirmInCenterTime (this webservice calls the ExamOne Schedule4Real service to the book the In Center Paramed Exam appointment)
- SubmitParamedOrder (this webservice call, will submit the paramed order ticket to the ExamOne vendor)

1.4 Rules

Set up the rules that apply to the wizard, which are associated with the ExamOne integration. Common rule examples and ExamOne data items are outlined in this section.

PLEASE NOTE: the below example rules are just a subset of the rule sets. For the complete rule sets, please access the Ruleset File listed below.

Complete rulesets and a wizard template are located in: Admin Help

- The Wizard file name is "Paramed.txt".
- Ruleset file names are "Paramed.xml, Paramed ExamOne.xml Rule Sets".

All rule examples in this section assume you are using the data item ID of "FLI-UNDERWRITING_PARAMED_SELECTED".

1.4.1 Control when the Paramed Exam Scheduling takes place: Pre- or Post-Sign

This is determined by the carrier as part of their set-up and is applicable to all carrier users. This cannot be changed by and agent or distributor.

Required: FLI_UNDERWRITING_PARAMED_SELECTED

```
<block>
  <set name="message">
    <const value="This field is required." type="String" />
  </set>
  <if>
    <condition>
      <isnullorwhitespace>
        <diget dataitemid="FLI_UNDERWRITING_PARAMED_SELECTED" />
      </isnullorwhitespace>
    </condition>
    <postmessage dataitemid="FLI_UNDERWRITING_PARAMED_SELECTED">
      <get name="message" />
    </postmessage>
    <else />
    <removemessage dataitemid="FLI_UNDERWRITING_PARAMED_SELECTED" />
  </if>
</block>
```

1.4.2 Enable (Valued): FL_UNDERWRITING_PARAMED_SELECTED

This rule enables the common data tag associated with the Paramed Vendor designation to be used by the agent. Day 1, only ExamOne is available.

```
<setcontrolstate dataitemid="FLI_UNDERWRITING_PARAMED_SELECTED"
clearondisable="true">
  <compare op="==">
    <diget dataitemid="Exam_Order_Request" />
    <const value="Yes" type="String" />
  </compare>
</setcontrolstate>
```

1.4.3 Leverage ExamOne Check Availability to Control the Request Exam Date

Set up rule to check the availability of the Request Exam Date.

```
<block>
  <set name="message">
    <const value="The date requested must be at least 3 days from now." />
  </set>
  <if>
    <condition>
      <not>
        <isnullorwhitespace>
          <diget dataitemid="ExamOne_Requested_Exam_Date" />
        </isnullorwhitespace>
      </not>
      <not>
        <isnull>
          <diget dataitemid="ExamOne_Requested_Exam_Date" type="DateTime" />
        </isnull>
      </not>
      <not>
        <compare op=">=">
          <abs>
            <datetimedifference option="Day">
              <datetimenow />
              <diget dataitemid="ExamOne_Requested_Exam_Date" type="DateTime" />
            </datetimedifference>
          </abs>
        </compare>
      </not>
    </condition>
  </if>
```

```

    </abs>
    <const value="3" />
  </compare>
</not>
</condition>
<postmessage dataitemid="ExamOne_Requested_Exam_Date">
  <get name="message" />
</postmessage>
<else />
  <removemessage dataitemid="ExamOne_Requested_Exam_Date" />
</if>
</block>

```

1.4.4 Leverage ExamOne Book Appointment to Control the Confirm the Exam Date

```

<setcontrolstate dataitemid="ExamOne_Reservation_Custom_Action"
clearondisable="true">
  <and>
    <compare op="==">
      <diget dataitemid="Check_SpecificDate_ExamOne" />
      <const value="Yes" />
    </compare>
    <isnullorwhitespace>
      <diget dataitemid="ExamOne_Paramated_Confirm_ID" />
    </isnullorwhitespace>
  </and>
</setcontrolstate>

```

1.4.5 Paramed Data Items to be used in Rules

List of Paramed specific data items that can be used in rules and the provider. Along with the Admin control in the Groups Settings, these dataitems are used to give the user additional control, to help support our carrier/distributor preference. These dataitems are listed below:

- FLI_UNDERWRITING_PARAMED_REQUIRED
- FLI_UNDERWRITING_PARAMED_SELECTED
- FLI_UNDERWRITING_PARAMED_POST_SIGNATURE

FLI_UNDERWRITING_PARAMED_REQUIRED will allow the paramed ordering to be either enabled or disabled based on carrier preference. FLI_UNDERWRITING_PARAMED_REQUIRED= true will enable paramed ordering, while FLI_UNDERWRITING_PARAMED_REQUIRED=false will disable the functionality.

FLI_UNDERWRITING_PARAMED_SELECTED will give the user the choice to either choose between the ExamOne ordering platform or the ExamOne ordering platform. "ExamOne" or "ExamOne" will be used as list values. For example: FLI_UNDERWRITING_PARAMED_SELECTED const value=ExamOne would allow the ExamOne ordering platform to be called, while FLI_UNDERWRITING_PARAMED_SELECTED const value=ExamOne would allow the ExamOne ordering platform to be called.

FLI_UNDERWRITING_PARAMED_POST_SIGNATURE is used to indicate a carrier's decision on when the order can be placed. The export values are 'true' or 'false'. When 'true' is utilized, it triggers the 'post' signature order process. When 'false' is utilized, it triggers a 'pre' signature order process.

NOTE: This must be determined by the carrier at the beginning of setup. The selection applies to all scenarios.

1.5 Data Group Properties for Paramed Ordering Values

New data group properties are required to capture information returned from the vendor webservice calls for the paramed ordering. Specific dataitems will need to be added to the package for each of these data group properties in order to capture the returned data elements. These new data group properties are listed below:

Paramed_ExamLocationAddress_Line1
Paramed_ExamLocationAddress_Line2
Paramed_ExamLocationAddress_City
Paramed_ExamLocationState
Paramed_ExamLocationAddress_Zipcode
Paramed_ExamLocation_Phone

1.6 ExamOne Paramed Exam Scheduling: Required Data Group Properties

1.7 ExamOne: New Tag Creation of <PARAMED_VENDOR_NAME> for use within the new email templates for the Paramed Status communications

To properly populate the vendor information within the newly created email templates for the paramed exam integration (ordering) effort, a new email tag of <PARAMED_VENDOR_NAME> has been created.

This tag will be included in each of the four new email templates that have been created. This field / tag will receive the name of the specific paramed exam vendor, ExamOne, that is performing the services and sending status updates for the case. This tag will be populated by the vendor's name, ExamOne, as extracted from the vendor's paramed exam status file (1122 file)

1.8 ExamOne: Email Templates for Status

Four new email templates have been created. These emails will keep the advisor apprised of any status updates related to the processing of the scheduled exam.

- Paramed Exam Status ExamOne: Update
- Paramed Exam Status ExamOne: Agent Action Recommended
- Paramed Exam Status ExamOne: Exam Cancelled
- Paramed Exam Status ExamOne: Complete

Templates are as follows:

Email Category: System

Email Template Type: **Paramed Exam Status ExamOne: Agent Action Recommended**

Email Subject: <CASE_NAME> -Paramed Exam Status Update: Agent Action Recommended

Dear <AGENT_NAME>.

<CASE_NAME> has received a status update from <PARAMED_VENDOR_NAME> on behalf of <COMPANY_NAME>. The status received from <PARAMED_VENDOR_NAME> indicates your client may have some questions or <PARAMED_VENDOR_NAME> is having difficulties in contacting your client. You may wish to contact your client to answer any questions and/or help secure updated information for <PARAMED_VENDOR_NAME>. Please contact <PARAMED_VENDOR_NAME> directly for additional details.

<MESSAGE>

Email Category: System

Email Template Type: **Paramed Exam Status ExamOne: Exam Cancelled**

Email Subject: <CASE_NAME> - Paramed Exam Cancelled

Dear <AGENT_NAME>.

<CASE_NAME> has received a status update from <PARAMED_VENDOR_NAME> on behalf of <COMPANY_NAME>. The status returned indicates that this paramedical exam has been cancelled. Please contact <PARAMED_VENDOR_NAME> directly for additional details.

<MESSAGE>

Email Category: System

Email Template Type: **Paramed Exam Status ExamOne: Update**

Email Subject: <CASE_NAME> - Paramed Exam Status Update

Dear <AGENT_NAME>.

<CASE_NAME> has received a status update from <PARAMED_VENDOR_NAME> on behalf of <COMPANY_NAME>. This email is being sent to inform you of the current status of the

paramedical exam order. Agent action may or may not be necessary at this time. Please contact <PARAMED_VENDOR_NAME> directly for additional details.

<MESSAGE>

Email Category: System

Email Template Type: **Paramed Exam Status ExamOne: Complete**

Email Subject: <CASE_NAME> - Paramed Exam Completed

Dear <AGENT_NAME>.

<CASE_NAME> has received an updated status from <PARAMED_VENDOR_NAME> on behalf of <COMPANY_NAME>. The status received from <PARAMED_VENDOR_NAME> indicates that this paramedical exam order has been completed.

<MESSAGE>

1.9 ExamOne: Status Code that will trigger each Email Template

There are four possible email templates that could be triggered based on the information received in the EXAMONE 1122 status file (*these templates will be available and can be utilized in the February 2.23 release*). These templates are:

Paramed Exam Status ExamOne: Update

Paramed Exam Status ExamOne: Agent Action Recommended

Paramed Exam Status ExamOne: Exam Cancelled

Paramed Exam Status ExamOne: Complete

2 ExamOne: Create New Page

In signing ceremony, applied signature, "I Consent", when still in signatures - a new page will display for Paramed scheduling information to display.

2.1 ExamOne: New Data Page for Post-Signature Workflow

- ExamOneGetMobileTimes
- ExamOneConfirmMobileTime
- ExamOneGetInCenterLocations
- ExamOneGetInCenterTimes
- ExamOneConfirmInCenterTime
- SubmitParamedOrder

New Data Page to be created to support the ordering of the paramed exams POST client signature process. This new Data Page to be displayed after the Proposed Insured has signed the application and has selected "I Consent" on the signature panel and the common data tag FLI_UNDERWRITING_PARAMED_EXAMONE is set to 'post' and the common data tag FLI_UNDERWRITING_PARAMED_SELECTED is set to EXAMONE.

The dataitemid FLI_UNDERWRITING_PARAMED_POST_SIGNATURE = 'true' indicates the carrier's preference to allow the paramed exam to be ordered but only AFTER the Proposed Insured has signed the application.

The dataitemid FLI_UNDERWRITING_PARAMED_SELECTED will indicate which Vendor will be called. Export value of 'ExamOne' will allow for integration with ExamOne and the export value of 'ExamOne' will allow for the integration with ExamOne

Once the Insured has clicked on the "I Consent" button in the eSig process:

The New Data Page:

Please select the date that you would like to schedule the Paramed Exam: (the default of the first available date, needs to be 3 business days out from current date)

Sample screen that will display to start the scheduling process. Date will auto-populate with a date that is 3 days out from current date. ***Please note: ExamOne requires that the requested date must be at least current date or later date.***

Mobile Appointments:

Sample screen with response back from ExamOne with the requested date and the available time slots:

Please select the time that you would like to schedule the Paramed Exam: Mon, 07 Mar 2022 04:00 AM ▼

✓ Book Exam Appointment

374 appointments with duration of 45 minutes

⊖ Skip

Sample screen with response back from ExamOne with a confirmation that the appointment has been booked:

Please select the time that you would like to schedule the Paramed Exam: Mon, 07 Mar 2022 11:30 AM ▼

✓ Book Exam Appointment

374 appointments with duration of 45 minutes

(Confirmed for Monday, 07 March 2022 11:30 AM. Appointment duration 45 minutes Appointment ID = 100063763232 100063763232)

In Center Appointments:

Sample screen with response back from ExamOne with the available In Center Locations and requested date and the available time slots:

Sample screen with response back from ExamOne with confirmatoin that the appointment has been booked at the requested location and the desired date and time slot:

2.2 ExamOne: New Data Page for Pre-Signature Workflow

New Data Page to be created to support the ordering of the paramed exams PRE client signature process. This new Data Page to be displayed after the Proposed Insured has signed the application and has selected "I Consent" on the signature panel and the common data tag FLI_UNDERWRITING_PARAMED_EXAMONE is set to 'pre' and the common data tag FLI_UNDERWRITING_PARAMED_SELECTED is set to ExamOne.

The dataitemid FLI_UNDERWRITING_PARAMED_POST_SIGNATURE = 'false' indicates the carrier's preference to allow the paramed exam to be ordered but only AFTER the Proposed Insured has signed the application.

The dataitemid FLI_UNDERWRITING_PARAMED_SELECTED will indicate which Vendor will be called. Export value of 'ExamOne' will allow for integration with ExamOne and the export value of 'ExamOne' will allow for the integration with ExamOne

[new common data tag referenced above are being requested for this release]

SET UP HELP/INSTRUCTIONS: These are not common tags and can be named whatever the carrier deems most appropriate

SET UP HELP/INSTRUCTIONS: These are common tags specific to the Paramed Order process. These dataitemid and export values must be used.

SET UP HELP/INSTRUCTIONS: The two questions above will need to be asked first, regardless of when the order is to take place, either pre-signature or post-signature. If the carrier has determine the order is pre-signature, the remainder of the wizard below needs to be set up to facilitate that process. If the order is to happen post-signature, none of the APPS PARAMED ORDERING wizard needs to be set up as all of the remaining steps will be displayed after the signature is collected.

☒ Pre Sign order ☐ Post Sign order

SET UP HELP/INSTRUCTIONS: These are common tag items specific to the Paramed order process and these dataitemids and corresponding export values must be used. These are to be hidden items and uneditable. The carrier is to determine up front what they will allow for paramed ordering. They have to indicate if they will allow the agent to trigger a paramed order prior to the application being signed or if the paramed order must take place after an app is signed. The export value of "false" indicates the paramed order is to take place as part of the data collection process pre-signature. An export value of "true" indicates the paramed final ordering will take place after the insured has signed the application. A rule is to be written to set this item per the carrier's decision (pre or post) and this is to be hidden from the agent.

Check Availability outbound webservice call:

- Would you like to check and see if a specific date is available for the paramed exam?
 - No – if they answer “No”, no paramed exam is scheduled, the Submit Paramed Order Custom Action Button is to be displayed. This will allow the agent to immediately submit the paramed order to the vendor. In this instance, the vendor will contact the client directly to schedule the paramed exam.
 - Yes – if they answer “Yes”, the required steps will display.
- Input a Requested Exam Date, that **must be at least current or a later date**.
- Click on the ‘Check Availability’ button in triggered the webservice call to ExamOne to retrieve what examiner(s) and time slot(s) are available to select from.

[new common data tag referenced above are being requested for this release]

3 ExamOne: Audit and Activity Reports

Audit history will be updated whenever there is a webservice call out to schedule a paramed exam, check availability, book appointment. Also, when a status file has been received, and when an email has been sent to the agent.

3.1 ExamOne: Create Activity Report

An activity report is being creating that can be triggered daily, weekly, or monthly based on carrier preference.

Report is to include:

- Organization name
- From Date
- Through Date

Data Columns to be included are:

- **Paramed Vendor** (name of the specific vendor used for the paramed exam)

- **Paramed Status** (current status in FireLight of the paramed exam as determined by the processing of the 1122 status file)
- **Order Date** (date in which FireLight originally sent the paramed exam order to the vendor)
- **Last Status Date** (Date in which the most recent 1122 status file was received, if any. If no 1122 status file has yet been received, this is to remain blank.)
- **Product Name**
- **ApplicationID**
- **Application Name**
- **Writing Agent Name**
- **Username**
- **External Role Code**
- **Carrier**

Sample Report:

Organization: XYZ Insurance Co

From Date: 9/01/2021

Through Date: 9/17/2021
