

# FireLight Localization

Add ability to globalize/localize FireLight.

## Workflow Changes

No workflow change.

## Features/Requirements

1. Provides ability for carrier Admin to translate FireLight UI to another language.
2. Provides default translation using Google Translate service.
3. Provides ability for FireLight App user to switch languages.

## Admin Changes

A new module “Localization” will be turned on if –

1. Organization’s Country - the primary language is not English.

Example: Sagicor Barbados – Country: Barbados, Language: Español

## 2. Carrier Admin “Localization”:

Localization for Sagicor Life Insurance Company Barbados

Google translate

Translate UI Text

UI Labels: Views.Applications.Summary

Save Changes

Español - Spain

English	Translation
* Application Name is required!	* Se requiere Nombre de la aplicación!
Application Name	Nombre De La Aplicación
Carrier	Portador
Created	Creado
Current Status	Estado Actual
Errors On Forms	Los errores en los formularios
Jurisdiction	Jurisdicción
Last Updated	Última Actualización
No Error	Sin Error
Policy	Política
Product	Producto
Yes	Sí

- The primary language is pre-selected (and disabled).
  - Default translation is provided by “Google Translate” service.
3. Each UI segment/element translation can be customized by carrier Admin. “Save Changes” will save the new value.

- Select different "area" of the UI to translate:

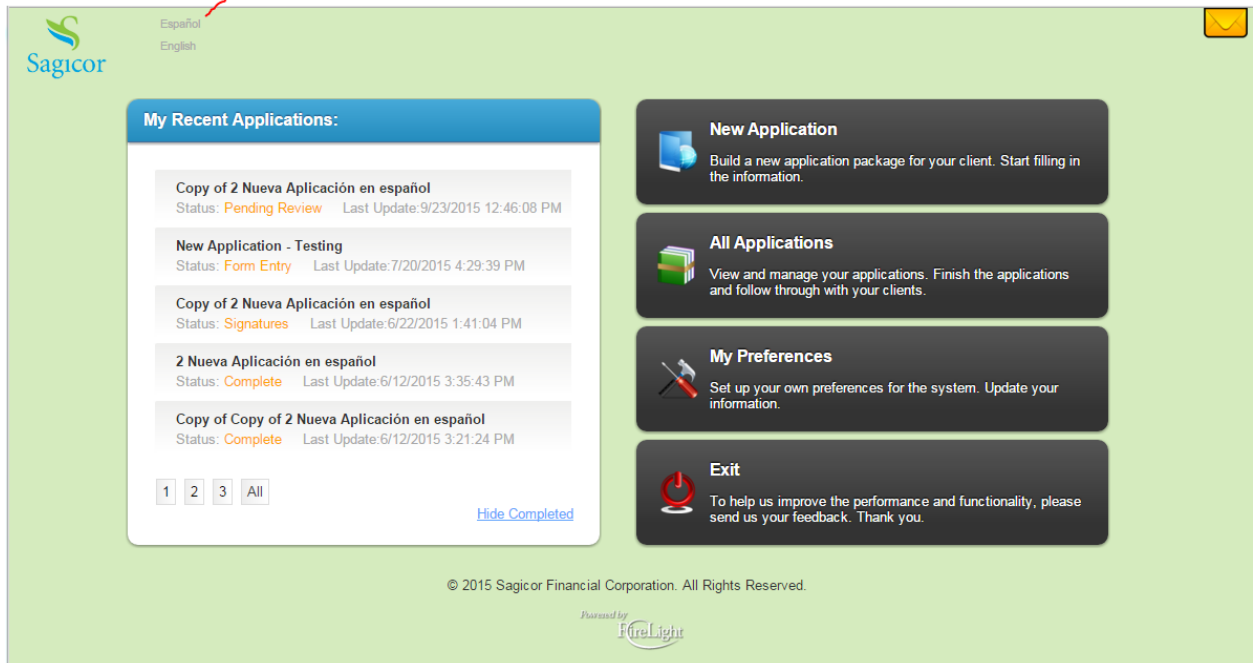

- Jurisdiction list for the carrier's country can be configured in carrier's config database and will be used throughout Admin and FireLight:

## App Changes

1. A “Language” selection is automatically placed on FireLight next to carrier’s logo.

2. Select “Espanol”:

- English will always be available. The last language selected will be the agent's language "Preference".
- Jurisdiction list will reflect the carrier's country:

The screenshot shows a web browser window with the URL <https://firelight.insurancetechnologies.com/EGApp27/8d2de32101bde69dfc/NewApplication>. The page has a header with the Sagikor logo and navigation links: 'Hogar', 'Nueva Aplicación', 'Todas las aplicaciones', 'Mis Preferencias', and 'Desconectarse'. The main content area is titled 'Crear una nueva aplicación' and features a 'Jurisdicción' dropdown menu. The dropdown is open, showing a list of countries: Anguilla, Antigua and Barbuda, Aruba, Barbados, Belize, Curacao, Dominica, Grenada, Jamaica, Panama, Saint Kitts and Nevis, Saint Lucia, Saint Martin, Saint Vincent and the Grenadines, and Trinidad and Tobago. There is also a 'Tipo De Producto' dropdown and a 'Selecione Jurisdicción' button.

- All areas in FireLight will be translated into the selected locale:

The screenshot shows the 'Attestation Form' page in the FireLight application. The page has a progress bar at the top with four steps: 1 FORMULARIO DE INICIO, 2 FIRMAS, 3 COMENTARIO (current step), and 4 FINALIZAR. The main content area is titled 'Solicitud Pendiente' and displays details for an 'Application Review' request. The details include: Tipo De Solicitud: Application Review, Beneficiario: whendricks@insurancetechnologies.com, Mensaje Enviado: whendricks@insurancetechnologies.com, Fecha: 9/23/2015 6:46:08 PM, and Código de acceso: N13BPF9. There are links to 'Enviar Recordatorio para', 'Enviar Código de acceso a', and 'Cancelar este pedido'. A '[Cerrar]' button is also visible.

## Areas Impacted

System Area	Yes	Comment
Admin Tool	X	New Module "Localization"
FireLight App	X	Localized UI
