

iConnect 124555 Design Approach

The ability to call out to update the user will be added to firelight when an application is created behalf of another user.

Workflow Changes

No workflow changes.

Features/Requirements

- A tie into the create app call.
- A call into the provider for it to call a clients server to request a new 1228 for a particular user.
-

Admin Changes

No admin changes required.

App Changes

When an application is created on behalf of another user the back office will be called and asked to request a new 1228 for that user.
