iConnect Design Approach - DTCC Email Notifications.....	4
1 Enhance the DTCC email Notification to include FL Support Distro.....	4

iConnect 227385 Design Approach - DTCC Email Notifications

Project Overview

For this enhancement, an email notification needs to be sent to FL-Support when any potential exception occurs for applications containing an App/Sub that would cause the application to not be sent or received. This email can be sent any day at any time, and will notify our support staff of the issue so we can help resolve it in a timely manner.

Impacts: DTCC App/Sub Transmission - an email will be sent to the FL Support team if an exception is thrown to cause these files to not be sent or received

1 Enhance the DTCC email Notification to include FL Support Distro

We need to add the ability to send an email notification for any exception that could cause a failure of sending or receiving DTCC Files to the FL-support email distro. This needs to occur throughout all hours of the day and every day including weekends and holidays. The DTCC App/Sub process typically occurs from 7am-4pm Monday through Friday, however we will want to make sure that if any exceptions do come through, that the FL-support team is notified.

Acceptance Criteria

- If any exception that causes a failure for DTCC Files to not be sent or received, the FL-Support distro will be notified via email
- The email notification will need to be able to be sent anytime an exception could occur, so all hours of the day and all days including weekends and holidays
