iConnect Design Approach - Deployment Enhancements for speed

Project Overview

Chris to define

1 1-Deployment tab Enhancements

To help decrease the load times for selecting a deployment configuration we will add the following enhancements to the deployment tab.

Change the default in the synchronization scope to Select Scope.

The addition of a dropdown field within the Deployment tab entitled To Organization. This will allow the user to select an Organization without having to view all other applicable organizations that are available for deployment.

Load Deployment information button. This button will enable the Description, Organization and Deploy check box in the Deployment details.

Synchronization Scope: Distributor All Configuration
Reason:

Deployment
History

Organization: FL Access Brokerage - Test
Load Deployment Information
Cancel

Type here to filter by organization or description
Check / Uncheck All

Description	Organization	Deploy
Accumulation Product	FL Access Brokerage - Test	<input type="checkbox"/>
Annuity 222	FL Access Brokerage - Test	<input type="checkbox"/>
Annuity 333	FL Access Brokerage - Test	<input type="checkbox"/>
eDelivery	FL Access Brokerage - Test	<input type="checkbox"/>
Julie Product	FL Access Brokerage - Test	<input type="checkbox"/>
Lifetime Income	FL Access Brokerage - Test	<input type="checkbox"/>

Form Changes:	0
Package Changes:	0
Sales Agreement Changes:	0
Rule Set Changes:	0
Custom List Changes:	0

Acceptance Criteria

- Synchronization Scope defaults to Select Scope
- To Organization dropdown has all applicable Organizations present and is defaulted to All Organizations
- Load Deployment Information enables the Description, Organization, and Deploy options of the Deployment details.

2 2-Deployment History Tab Enhancements

Several updates will be added to the History tab of the Deployment screen to decrease load time. FL experiences long load times when generating history. To help with this the following will be added.

The addition of a dropdown field will allow the user to select the proper environment in which they want to view their history. The To Server field will have the options of UAT, Staging, and Production.

The To Organization dropdown field will allow the user to access a selected Organization or All Organizations to view the selected History.

Date Range fields will also be implemented to allow for a specific time frame to be viewed by the user. These fields will include calendars for the user to select from and also be editable in the case where the user would like to enter the date manually.

Finally, a Load History button will be available to load all preferences that the user has selected from the new options as well as giving the state of the deployment ie Success or Failure. This information will still be viewable in the same history box as is found today.

The example below shows all new enhancements described above:

Deploy - FL Access Carrier - Test

Synchronization Scope: Select Scope

Reason:

Deployment

History

To Server: All

To Organization: FL Access Carrier - Test

Start:

End:

Load History

Cancel

Select a Synchronization Scope, optionally choose a server, organization or date range, then click **Load History** to load deployment history.

Add a cancel to this view as well.

Acceptance Criteria

- To Server dropdown field will allow for environment selection. Options are UAT, Staging, and Production
- To Organization dropdown field gives a list of applicable Organizations to select from. All organizations will also be available in this field.
- Date range fields allow for a date range of the history on a specific deployment. Calendars enable once the field is selected. Date range fields can also have dates manually entered.

- Load history Button will load the specific history from all options above along with the status of the deployment ie. Success or Failure. The history will still be viewable in the same history box as it is today.
