iConnect 222394 Design Approach - Allow for individual names for documents that are uploaded via the review queue

Project Overview

Currently, when a document is uploaded, the document tag is what is displayed as the identifier for the document. For this enhancement, the user would see an additional unique identifier when a document is uploaded, so they can distinguish what has been uploaded. This unique identifier would be based on the current PDF name. For example, if a user uploaded a document named "New BD Sample" and selected the document type as "Reviewer Documents", both the name and the document type will be listed:

Impacts:

Upload Functionality -UI - The current name of the PDF will display as the additional unique identifier.

Review Queue History Tab - UI - An additional hyperlink will be added to view attached documents, within that list, the PDF name and document type will display

Review Queue Reviewer List - UI - An additional hyperlink will be added to view attached documents, within that list, the PDF name and document type will display

1 Use PDF Name as the naming convention for uploaded document

Instead of showing the document tag as the name of the document that is uploaded, we need to add a unique name for each document that is uploaded.

For this enhancement, we will want to use the displayed name of the PDF as the unique name for the uploaded document.

We will want to keep the document type as an additional identifier for that document.

Reviewer Documents

Add Supplemental Document

Document Type: Reviewer Documents

Note: Supplemental documents must be in PDF format and no larger than 20 MB.

Choose File

New BD Sample.pdf

Upload

New Naming Convention

When the document has been uploaded, we will see the PDF name displayed first, then the document type identifier, and then the "view" and "remove" hyperlink.

Add Supplemental Document

Document Type:

Reviewer Documents

Note: Supplemental documents must be in PDF format and no larger than 20 MB.

Choose File

No file chosen

Upload

Acceptance Criteria

- When selecting to upload documents, user will be able to set a document type and choose file. When a file is chosen, it will display the name next to choose file button.
- PDF Name will be displayed as the uploaded document name
- When a document is uploaded, the pdf name will be displayed, followed by the document type, and then the "view" and "remove" hyperlinks
- The "view" hyperlink will open a new tab and display the uploaded documents
- The "remove" hyperlink will remove the document from the uploaded list
- For in-flight orders, FL will not know the name of the documents so we will display the document type; so the Document Type would repeat for inflight orders.
