iConnect 256361 Design Approach - Web Content Accessibility Guidelines (WCAG version 2.1) - Orientation and Resize Text 2.23 (256361)

Additional enhancements are needed to complete adherence to WCAG Guidelines version 2.1 for Level AA compliance.

1 WCAG Enhancements - Orientation and Resize Text

Known items were incomplete from a previous release in relation to text display and resizing to meet WCAG 2.1 Level AA compliance. The items being addressed in the current release are related to orientation and resizing of text.

Impacts:

- Orientation works as expected in portrait modes on iPad when text is localized (French or Spanish).
- Resizing text/adjusting zoom of page does not cause text to be cut off the page.

1.1 WCAG: Orientation issues for French & Spanish locale in portrait modes of iPad Pro

For localized pages, content is not displaying properly on portrait modes of tablets, such as iPads. When the activity has a long name, the wording hides behind the other buttons on the page.

Acceptance Criteria

- CSS styling for clients with localization displays appropriately.
- Localized page displays activity name appropriately on tablets or devices such as iPads.
- Message Center icon does not disappear for an activity that has a long name.

1.2 WCAG: Multiple issues related to Resize Text

When text is resized (zoom scale changed for the page), the text does not always appear properly without horizontal and vertical scrollbars.

Acceptance Criteria

- Zoom to 200% displays the text appropriately on the page without horizontal and vertical scrollbars.
